EDUCATION

Bachelor of Arts in **Digital Media** at the **University of Central Florida**
Expected to graduate in **May 2024**

EXPERIENCE

Front-End Coordinator at **Publix**

September 2022 - Present

- Multitasked verification of lottery assets, counting of cash in registers, and answering of customer inquiries
- Strategically prioritized tasks based on urgency and time to complete
- Efficiently provided customer service during calls in a personable manner and transferred calls to the appropriate department when necessary

Junior Front End Web Developer at **Trajector** (formerly **Loxley Services**)

November 2020 - November 2021 (1 Year)

- Lead the creation of an Electron based desktop application to assist operators during veteran crisis situations
- Designed user-centric interfaces using Figma based on client needs
- Assisted senior developers in the creation of a React Native application targeting mobile devices
- Ensured the employment of best practices when coding responsive and accessible user interfaces

PROJECTS

Weather | Global Weather Data Interface

A simple, yet informative weather website using the [OpenWeather API](#) to acquire the current weather of any city around the world.

The goal for this project was to fetch API data and display said data in a presentable manner.

An OpenWeather API key is required to use the demo.

PassGen | Secure Password Generator

A highly customizable password generation experience that is all handled client side for extra security.

The goal for this project was balancing code complexity with code readability.
